Mô tả công việc

mo mo [Careers]   ☰

Personalization and Financial Services;

- Collecting, cleaning, preparing data at large scale for modeling;

- Adding new features, exploring new approaches to keep pushing the model performance;

- Participating in productionizing Machine Learning models for live production;

- Designing, conducting A/B tests and analyzing the results for experiment insights;

- Building pipelines for continuously validating and updating models.

Yêu cầu công việc

- Degree in Computer Science or related fields;

- 1+ years working experience,hands-on with ML, or 2+ years with Ph.D. degree;

- Good understanding of mathematical foundations of Machine Learning algorithms;

- Have practical experience in applying Machine Learning in personalization, credit scoring or user behavior analysis;

- A builder. You go the extra mile to bring your prototypes to production;

- Strong product ownership. You take a high responsibility for what you build. You keep a high bar for product quality;

- Strong collaboration skills. You reach out to help other team members;

- Experience with credit scoring or financial service models is a plus.
